

JPC Doorsets

Bespoke architectural doors and ironmongery

JPC Doorsets Ltd

JPC Doorsets has grown organically from our established bespoke joinery company. Realising the need from clients for betterment in managing and processing doorset orders, from inception to delivery, we now have a dedicated door manufacturing facility. This has the expertise and knowledge needed to produce high-spec, large volume orders, whilst maintaining the quality craftsmanship required to fulfil our client's individual needs.

Our tailored approach

In an ever demanding sector, JPC have the knowledge, experience and capabilities required to fully understand and realise unique projects within the construction industry.

JPC Doorsets manage and oversee all elements of the process. From initial discussions and understanding of budgets, we formulate a complete schedule that incorporates specific design, fire, acoustics, security and quality. This ensures that we will tailor our manufacturing and delivery phases to complement any construction programme required. Following approval of scheduling, the production of each project moves into our fully operational, purpose built facility for manufacturing.

Established in 1986, we continue to grow and invest into our family run business, and we embrace both the opportunities and demands that continually arise within the built environment.

Machine shop

CNC shop

JPC Doorsets are based in Cannock, Staffordshire. We are positioned only 5 minutes from J11 of the M6 and M6 Toll, giving us excellent links to all areas of the country. From our 20,000 sq ft manufacturing facility, we are privileged to have a team of long established and experienced craftsmen. Combining both our collective knowledge and our technical capabilities, JPC can produce high quality bespoke doorsets to any specification required, and fulfil any potential order, whatever the size.

JPC Timber Doorsets

JPC Doorsets can be supplied in numerous finishes, from all species of timber veneer, HPL laminates, high impact thermoplastic surfaces or paint grade. We can offer fire ratings from FD30 through to FD120, and acoustic ratings in excess of 40 dB.

Fire Ratings

FD30

Supplied in all finishes with an MDF, softwood or hardwood frame

FD60

Supplied in all finishes with a hardwood frame

FD90

Supplied in all finishes with a hardwood or composite frame

FD120

Supplied in all finishes with a composite frame

VPs

All of our doors can be supplied with vision panels of different sizes and shapes. These are available in all fire ratings. For specific environments, integral blinds can also be installed.

JPC Doorsets holds third party accreditation as a certified installer of passive fire protection products

Acoustics

For enhanced acoustic performance, we stock a number of varied door cores, supplied in any finish, that can be adapted to suit an acoustic rating in excess of 40 Rw dB. Where required, drop down seals can be fitted to the bottom of the door to maximise the acoustic rating.

Finger Guards

For educational environments or hospitals, extra protection can be provided with the addition of finger guards, to ensure maximum safety is obtained.

Door Edge Protection

Door edges are extremely vulnerable from passing traffic in high use areas. PVC door edge protectors can be fitted to both new and existing doors, offering a robust solution which will extend the life of the door dramatically. The durability of door edge protectors ensures the fire integrity will not be compromised, and also offers a low maintenance option which is cost effective.

Door Frame Protection

Conventional door frames are very susceptible to impact damage from trolleys or wheeled traffic, which are typical in hospitals and education facilities. The introduction of PVC protected door frames and architraves offer an extremely durable solution, whilst helping to maintain the fire integrity of the doorset.

JPC Paint Grade Doors

Paint grade doors can be supplied in the following format:

- Plywood faced - mainly used for external use
- MDF faced - internal use only, lippings to edges will be exposed
- Kraft paper overlay - internal use only, concealed lippings, ideal surface for paint

JPC Veneered Doors

Veneered doors can be supplied in a wide range of species and different finishes, ranging from a matt to a high gloss lacquer. Veneers can be laid using either crown cut or quarter cut, depending on the aesthetic look desired. On bespoke packages of pairs of doors, or doors with over panels, components can be book matched.

JPC Laminate Doors

Laminate doors can be built from a vast range of laminates - whether plain colour, pattern or wood grain. These versatile and robust doors provide an eye-catching and long lasting solution, perfect for hospitals, schools and other commercial applications, which receive high traffic and where hygiene is a main concern.

JPC PVC Faced Doors

In areas of high traffic, wear and tear is inevitable, often resulting in damage that can compromise the integrity of the door. PVC faced doors provide a perfect solution, offering a durable protective layer, ensuring extended life and reduced maintenance costs. PVC protection to doors is available from an extensive range of colours and finishes.
